MBA Finance (December 2016); GPA: 4.00/4.00

Wharton School · University of Pennsylvania, Philadelphia, PA
B.S. Management (May 2005); GPA: 3.52/4.00

Institut Florimont, Geneva, CH
Baccalaureate ES (June 1997) · Mention Bien

WORK EXPERIENCE

Xargo Accolade, Monaco MC - Minsk BY - New York NY
C++ Developer/Architect (May 2000 – May 2005)

- Designed a Word Processor and Spreadsheet for Mobile Devices (Palm OS) on the now integrated Metrowerks' CodeWarrior platform using the C object oriented language. This project included scrolling and concatenation features as well as cell displays and functions to be rendered on micro-environments and 64K memory heap devices.
- Xargo was not commercialized due to its studio focus, minimal team and the low power CPUs of its targeted devices but due to its advanced stage of development it serves as a powerful and proprietary virtual machine for Microsoft environments using the primary global loop 'xserpentinestart' as an anchor for hardwired architectures.

JOYCHARGE Inc, New York NY - Geneva CH

HTML, Javascript, Source Hosting, SQL, C++, SSL, TLD Management (May 2008 – Present)

- Vision: To provide Hydrogen Solutions in the form of mobile devices and filling stations in central Metropolitan areas. The project follows the path of the 'daniell' Gravity Cell, first encountered at the University of Pennsylvania as a telnet and hosting username account. The 'daniell' Cell is a compact utility producing Hydrogen by splitting underground gases to produce an atom with a single electron. JOYCHARGE is a paradigm shift from standard energy field operations as it is universal, compact and independent.
- Developed a Virtual Store using an SQL database to produce and sell replicas of futuristic light sabers and retro ray guns, as well as fire-based hydrogen skin care and hair products.

RELATED ACCOUNTING EXPERIENCE

Madison Interiors Inc, New York NY

- Updated Receivables and Payables as well as Work in Progress and Inventory using Quickbooks.

SKILLS

Languages: English – French - Italian

Computers: Mac - PC - Adobe - Microsoft Office - Object Oriented Languages - PL/SQL
